

Meeting 1 7/8/2026

- Project intro
- Task assignment
- Team formation doc

Tasks(due 7/13 meeting):

- Each member come up with drone arm design
- Come up with team name
- Familiarize with project parameters, surrounding software(Github, Matlab, solidworks)
- Familiarize with drone designs

Meeting 7/13

- Drone arm design decision
 - One lattice, one beam design
 - 200mm in length
 - 0.5 kg payload to keep in mind
 - 4 screw hole mount on board side mount
 - 5 holes on the motor side
 - One hole is for the motor

Tasks:

- Design drone arm
- Matlab calculations

Meeting 7/16

- Went over different arm designs
- Discuss next steps
- Questions for mentors
- *Don't extrude all when modeling"

Tasks:

- Finish arm designs
- Import to matlab
- Individual position tasks. Ex: Peter hand calculations, Ryan Matlab

Meeting 7/20

- Showed off drone arm designs
- Progress check on code
- Individual tasks:
 - Ryan: MatLab refinement and drone arm design
 - Sheryl: Automation of FEA
 - Peter: Matlab full integration with calculations, start fea on solidworks or matlab, hand calculations.

- Zeke: start FEA

Meeting 7/25

- Discuss progress
 - Reviewing rubric
 - Progress check
- Tasks
 - Framing the analysis paper
 - Bring documentation of all our work

Meeting 7/27

- Discussed
 - Troubleshooting FEA analysis of drone arm
 - framework of final report (WIP)
 - https://docs.google.com/document/d/1UyT2mjGR5UQ10y8A2UiUn5nJ_5RRN3L5D9QPvKkJVdA/edit?usp=sharing
 - Please view (52:00) for an example of what a report should look like. <https://drive.google.com/file/d/19VeAa0xhaLb4zOY5UYRZ2yv5eY2Xvo7b/view>
 - Essentially a lab report/research paper
 - How to show the contributions of everyone
- Tasks:
 - We will decide on drone arms next meeting
 - Bring documentation of all our work
 - Start considering what part of the final report you want to handel
 - Send STL files on discord or wait to join github to do it
 - (optional) Come up with an idea on something to put on framing the final report or how to organize it if you can.

Meeting 7/30

- Discussed
 - Starting the final report
 - <https://docs.google.com/document/d/16f5VROC-a98OI-oM-qQzvU53HkUM9oq2mZzFt6363cQ/edit?usp=sharing>
 - Plan division of final report
 - Decide on 2 drone arms to pick
 - Consider a 3rd arm if time allows
- Tasks
 - Lock in final FEA results (8/2/26)
 - Work on your given section of final report

Meeting 8/3

- Discussed
 - FEA results
 - Working on Final Report
- Tasks
 - Peter: Finish sections on **drone arm** and hand calcs
 - Ryan: **Drone Arm section**, Add visuals (Graphs of info)

- Sheryl: **Drone Arm section**
- Zeke: **Drone Arm** section

Meeting 8/5

- Discussed
 - Final Arm choice: Circle Arm using aluminum alloy
 - Hand calcs
- Tasks
 - Sheryl: Finish analysis for report
 - Peter: Finish up drone arm section
 - Zeke: Finish drone arm section
 - Ryan: Organize github for submission and submit.
